

DORMA ED400-IG

—
Low energy operator

With the ED400-IG Automatic Floor Closer, applications can meet access requirements and maintain a classic look at the same time—such as an arched door or an all-glass façade. This revolutionary operator conceals the automatic components in the floor near the door threshold.

The ED400-IG functions in either low energy or full power mode, and can be used in both new construction and retro-fit applications. DORMA partnered with Opcon Manufacturing Systems to construct a closer that directs the energy generated by the ED400 drive unit to the pivot in a rotating motion, thus allowing consistent, smooth operation.

The install box that stores the operator is completely weather proof and is only 7" deep. Product features include Push & Go, Power Close, and Lock Interface.
