

THREE-ARMED TURNSTILES

The TP-1100 is a three-armed turnstile integrated by its special patented MRA movement with an anti-blocking function. Its structure is completely made in stainless steel and its dimensions make it suitable for use wherever simple and efficient controlled access is needed.

Technical Features

- Predisposition for insertion of recognition systems such as badge readers, or hand proximity
- Emergency function with free rotation in any direction
- Breach control (optional)
- Lighted LED indicators (optional)
- Emergency pull-down arms (optional)
- Emergency folding arms (optional)
- Command Console (optional)

Electrical System

Feed: 220V+/- 10%, 50 Hz.

Max, absorbed power: 70W

Functioning temperature: -20°C/ 70°C

Humidity: 90%

Shock absorber: hydraulic adjustable

Structure:

Chassis in stainless steel AISI 304 or 316

Performance

Degree of protection: IP44.

Weight

62 Kg
